Registration is free - But mandatory

Contact : 94443 64476, 97917 88768, 97914 98865

Prof. H.S.Bhat Mid-Term workshop

The ASU-Prof. H.S.Bhat Mid-Term workshop was instituted to commemorate the doyen of Indian urology, Professor Shashidhar Hattangudi Bhat (Prof. H.S.B to his contemporaries) who established the speciality of urology for over four decades. His humility, deep commitment to humanity and empathy for patients stood out throughout his life. He strove to pass these qualities on to his students, trainees, peers and those who sought his guidance and support during the early days of his career. He was also a strong votary of learning who acknowledged the ever evolving nature of medical science, and exhorted Urologist to evolve continually and thereby render good care to the patients who came to them.

Objective

The Objective of this workshop is to provide the practising Urologist and postgraduates a system of continuing medical education and an opportunity to update on recent advances.

To be held annually, this Programme will be unique with each year's programme focussing on one specific problem or issue in urologic practice.

The programme will be fully funded by ASU without any sponsors from the pharma companies.

Theme for the year 2022

This year's theme for the workshop is "Bleeding in Urology ". As simple as it may seem this topic is practically the most important and challenging.

All the important topics related to bleeding will be discussed by the speakers. Case scenarios of bleeding will be presented and taken up for discussion.
